SUMMARY

Full stack developer with 3+ years of experience building and running products from layout to deploy. Founder of Idle RO (a real-time browser MMO built with Vue 3, Node.js, PostgreSQL and Socket.IO, running on my own VPS) and FindMyAI (a directory of 13,000+ AI tools built with Next.js, Express and PostgreSQL); co-founder of PromoRadar (8 Node.js bots running 24/7, scraping 6 marketplaces). Product and ownership mindset: I understand the business, think about the user and keep the system up in production.

TECHNICAL SKILLS

Front-end: React, Next.js, TypeScript, Vue 3, Pinia, Tailwind CSS, Phaser, Mantine

Back-end: Node.js, Express, REST APIs, Socket.IO, JWT / OAuth, C++ / Lua

Data: PostgreSQL, MySQL, MongoDB, Firebase

Infra & DevOps: Linux (VPS), nginx, PM2, Docker, GitHub Actions, Vercel

Automation & Quality: Web scraping, Puppeteer, Telegram / WhatsApp bots, Vitest, ESLint

EXPERIENCE

Founder & Full Stack Developer | Idle RO · *idlero.com* *Jul 2026 - present · Own product*

- Built from scratch a browser idle MMO with a real-time persistent world: Vue 3, Pinia and Phaser on the front end; Node.js, Express, PostgreSQL and Socket.IO on the back end.
- Set up production on a Linux VPS (nginx, PM2, certbot, fail2ban) with a scripted deploy that validates migrations before restarting the API and swaps the build atomically.
- CI on GitHub Actions (Vitest + build), develop → main flow through pull requests and a UI in 5 languages, with around 2,100 commits in three months.
- Wrote a custom pipeline that converts original Ragnarok Online game files into sprites and maps for Phaser.

Founder & Full Stack Developer | FindMyAI · *findmyai.com.br* *May 2026 - present · Own product*

- Curated directory of AI tools for the Brazilian market: 13,000+ tools across 26 categories, with search, side-by-side comparison and no paid placements.
- Next.js 16 front end with internationalization (next-intl); Node.js/Express API with PostgreSQL and rate limiting; transactional e-mail with Resend.

Co-founder & Full Stack Developer | PromoRadar *Nov 2025 - present · Own product*

- 8 Node.js bots running 24/7 on a Linux VPS, scraping 6 marketplaces (Puppeteer, Cheerio): Amazon, Magalu, Shopee, AliExpress, Mercado Livre and Shein.
- Automatic deal distribution to Telegram and WhatsApp groups segmented by category.
- Affiliate links with conversion tracking, uptime monitoring and infrastructure management.

Front-end & Back-end Developer | Ragnarok Online servers *Dec 2024 - present · Freelance*

- EthelRo: built the server's website front end from scratch with Next.js, React, TypeScript and Mantine, integrating REST APIs for rankings, player status and accounts.
- C++ and Lua scripting for rAthena servers: game systems, events and rules, working directly with the MySQL database.

Co-founder & Developer | Grupo Altuori *Apr 2022 - Oct 2022 · Web agency*

- 8+ websites for real clients (solar energy, a law firm, a furniture e-commerce) in HTML, CSS and JavaScript.
- Full cycle: requirements, negotiation, development, hosting, delivery and support.

OPEN SOURCE

- String Guardian: Claude Code plugin that detects and preserves the encoding of files with accented characters (Node.js, Python). github.com/Pecinallix/string-guardian
- LUB ↔ LUA Converter: web tool that compiles and decompiles Lua bytecode in the browser (JavaScript). github.com/Pecinallix/Conversor-Lub-Lua

EDUCATION

Associate Degree in Systems Analysis and Development | Universidade Estácio de Sá · 2022 - 2024

CERTIFICATIONS

Tailwind CSS · Complete React · Next.js · JavaScript ES6 · HTML & CSS · CSS Flexbox & Grid · UX/UI Design

LANGUAGES

Portuguese: native · English: advanced technical reading
